✦ Jaipur, India

## PROFILE

DevOps Engineer (SDE-1) with an SRE focus and **5+ years in IT**. My background spans software development (C#/.NET), production support and team leadership, and I now own observability and alerting for **5 production IoT smart-metering environments** on AWS and Kubernetes. I design low-cost alerting pipelines, build SLA dashboards, automate daily health reporting and lead incident response and RCA. I'm known for clear client communication, calm incident handling and leading teams, having **led a 6-member support team** on a fintech lending product.

## TECHNICAL SKILLS

|                             |                                                                                                                                                          |
|-----------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Cloud (AWS)</b>          | EC2, EKS, Lambda, EventBridge, S3, RDS, ElastiCache, MSK, CloudWatch, SNS, IAM, VPC, Route 53, CodePipeline                                              |
| <b>Containers &amp; IaC</b> | Docker, Kubernetes (kubect!, EKS, KOPS), Helm, ArgoCD / GitOps, Terraform, Linkerd                                                                       |
| <b>Observability</b>        | Grafana, Grafana OnCall, Prometheus, Alertmanager, Loki, Promtail, Tempo, Zabbix, SigNoz, OpenSearch Dashboards, OpenTelemetry, Beyla (eBPF), CloudWatch |
| <b>Messaging &amp; Data</b> | Apache Kafka (MSK), RabbitMQ, Redis, EMQX (MQTT), PostgreSQL, MySQL, SQL Server                                                                          |
| <b>CI/CD &amp; SCM</b>      | AWS CodePipeline/CodeBuild, Jenkins, GitHub Actions, Git, GitHub, Bitbucket                                                                              |
| <b>Ops &amp; ITSM</b>       | Incident management, RCA, SLA/SLO reporting, SOPs, Jira, Confluence, ServiceNow, MS Teams integrations, Linux, Windows                                   |
| <b>Leadership</b>           | Team leadership (6), client handling, stakeholder communication, mentoring, on-call coordination                                                         |

## PROFESSIONAL EXPERIENCE

### DevOps Engineer (SDE-1)

Jul 2025 – Present

Polaris Smart Metering Pvt. Ltd. · Jaipur, India · IoT smart-metering platform (HES / MDMS / WFM) for state power utilities

- Own monitoring, alerting and SLA reporting for **5 production environments** running on AWS (EKS, RDS, ElastiCache, MSK, EC2).
- Set up **Grafana OnCall** alerting with escalation chains, voice-call escalation and MS Teams integration for **25+ critical alerts**, at **zero licence cost**.
- Later rebuilt alerting as a **fully \$0 Teams-direct architecture**: CloudWatch → SNS → Python Lambda relay, native Alertmanager Teams receivers and Zabbix webhook media types. This removed the dependency on a paid on-call platform.
- Audited alert delivery across 4 environments and found **broken notification templates that had silently blocked every Teams alert**. Fixed them and verified delivery end to end. Also split alerts by category (infra / database / application / network).
- Built **Grafana SLA dashboards** (Zabbix SLA API + Infinity datasource, dashboards-as-code in Python). They drive **daily SLA reports with RCA** and **monthly client availability reports**.
- Developed **Python AWS Lambda daily health reports** (EventBridge-scheduled) covering EKS nodes, RDS, Redis and Kafka. Fixed a triple-posting bug through retry and timeout tuning and chunked Teams posting.
- Configured Zabbix end to end for services and infrastructure. Set up SigNoz alerts for database, Redis and Kafka on one environment, and added pod-level filters to shared Loki log dashboards.
- Ran an **observability and cost audit across 5 environments**. Identified **~\$115/month** of waste (orphaned PVCs, frozen S3 log buckets, stopped-instance volumes). Also found and fixed an eBPF tracing bug that had silently stopped distributed traces on staging.
- Resolved production incidents: MSK Kafka disk pressure (plus threshold tuning), a hung monitoring server, and memory/disk exhaustion on the Zabbix server (PHP-FPM tuning, cutting disk use from 91% to 82%).

- Improved security by replacing static IAM-user access keys with an **EC2 instance role**. Deployed services through **AWS CodePipeline** and wrote SOPs that shortened resolution times.

## Associate Application Support Engineer · Team Lead (6)

Feb 2023 – Feb 2025

Sigma Infosolutions · Jodhpur, India · LendFoundry, a fintech lending platform (LOS & LMS)

- **Led a team of 6 support engineers**: shift planning, escalation handling, mentoring on cloud-native tools and DevOps practices.
- Maintained **Jenkins / Bitbucket CI/CD pipelines** for reliable deployments, rollbacks and service restarts. Managed pods and scaling with kubectl.
- Monitored infrastructure and services with **CloudWatch and OpenSearch Dashboards**. Traced **RabbitMQ** message queues to catch service disruptions early.
- Tuned **PostgreSQL** queries (ANALYZE VERBOSE) and resolved blocking sessions. Automated EBS snapshots, resource clean-up and yum security patching.
- Acted as the **primary technical contact for multiple enterprise clients**, keeping uptime, cost efficiency and incident communication on track. Authored SOPs.

## Technical Support Engineer

Oct 2022 – Feb 2023

Mphasis Ltd · Pune, India · Alight payroll portal

- Resolved incidents and requests in **ServiceNow** with a **90% end-user satisfaction** rate. Provided on-call L1/L2 support for AD, DNS, Citrix, VPN, Exchange and Office 365.
- Monitored Linux/Windows health (CPU, disk, uptime, processes), handled patching, encryption and firewall policies, and supported users remotely.

## Data Science Intern

Feb 2021 – Jul 2021

SWPL Geek · Jaipur, India · Stock analysis automation (FAANG stocks)

- Built a Python pipeline (Requests, BeautifulSoup, Selenium) to scrape, store and analyse stock data for FAANG companies, plus **Power BI** dashboards for stakeholders.

## Software Engineer

Mar 2019 – Mar 2020

Shinewell Innovations Pvt. Ltd. · Jodhpur, India · Loan-management systems & e-commerce

- Developed and maintained **C# / .NET** co-operative loan-management systems. Wrote SQL Server 2014 stored procedures, views and triggers.
- Core developer on the "Uniform Bazaar" e-commerce platform, built from scratch with an admin panel. Client point of contact for one project.

## CERTIFICATIONS

- **AWS Certified Cloud Practitioner**, Amazon Web Services (May 2025) · [Credly](#)
- AWS Educate: Introduction to Cloud 101 (May 2025) · [Credly](#)
- LinkedIn Learning: Python Essential Training, SQL Essential Training, Statistics Foundations (2022)

## EDUCATION

- **Master of Computer Applications (MCA)**, Lachoo Memorial College of Science & Technology, Jodhpur · 2021 · Honours
- **Bachelor of Computer Applications (BCA)**, Lachoo Memorial College of Science & Technology, Jodhpur · 2019 · Honours
